AMP RESEARCH Power Step

Nationally Distributed by **Bestop**

LIGHT THE NIGHT. ADD A GENUINE AMP RESEARCH LED LIGHT KIT.

Engineered to integrate with the AMP Research Power Step wiring harness, four (4) low profile LED lights are strategically placed under the rocker panel for broad coverage and reliability in extreme driving conditions. When doors open, the running boards are illuminated. While doors are open the lights stay lit for a full five minutes, allowing plenty of time for entry or exit. When doors close, the lights turn off automatically when the steps retract.

WATCH YOUR STEP! When the vehicle doors open and the step deploys, the LED lamps turn on (with a 5-minute auto-off feature) and automatically turn off when the vehicle doors close.

PLUG 'N PLAY

Designed to work with all AMP RESEARCH Power Step applications. Installs in under an hour by simply plugging the supplied wiring harness into the existing Power Step control module. Four LED lamps mount to the underside of the vehicle rocker panels with provided adhesive fasteners.

NOTE: EARLY POWER STEP MODELS MUST BE UPGRADED TO THE NEW STYLE POWER STEP CONTROLLER, PURCHASED SEPARATELY.

PART # 19-03297-93

LIGHT KIT IS NOT COMPATIBLE WITH 02-03 FORD SUPER DUTY.
